

Vivify Ideas QA Test

Directions:

You have 24 hours to complete this task.

See the web application on the link: <https://gallery-app.vivifyideas.com/>

Part 1 - Manual testing

PLEASE ANSWER THESE QUESTIONS (and send them in a Google Doc or PDF format)

1. How would you approach testing of this app?
 - a. Provide rough estimation and resources needed for testing this application.
 - b. State critical functionalities.
 - c. State testing types you would suggest for this application.
 - d. Describe which sequence/timeline of testing you would suggest, coverage, scope...
2. Please create a bug report for All Galleries screen.
3. Please create test cases for Editing a Gallery.

Part 2 - Automation task

We would like you to showcase your skills by automating a specific scenario. Please write automated tests in any programming language or any open source framework.

- Please write both **backend and frontend tests**.
- Please **upload your project to Github** with **commit messages** for every scenario.
- Please don't forget to properly fill out the **readme file**.
- For API testing you may export your collection with the environment and send it to Github.

- Try to cover everything you find important to automate.
- Please follow the coding standards.

1. **Log in** - Write positive login.
2. **Create Gallery** - Create gallery.
3. **Edit Gallery** - Edit gallery from step 2
4. **Comment gallery** - Find gallery from step 2 and comment
5. **Delete gallery** - from step 2
6. **Logout** - Create UI cases.
